2024 International Arbitration Competition Problems

Competitors are limited to using the players in the comparable player market provided for the applicable case (see spreadsheet attached to email).

Competitors are encouraged to use statistics and information beyond what is provided on this page. However, per the Collective Bargaining Agreement, Statcast metrics may not be used. All statistics and information must conform to the admissible years indicated in each of the cases below.

Only publicly available statistics through the 2023 season and publicly available information through December 24, 2023 are admissible. Events on or after December 31, 2023 and any actual deal reached in lieu of arbitration may not be referenced or discussed.

Statistics from the 2020 season **must be fully extrapolated to 162 game values** as indicated in the provided markets, and the career statistics must also be adjusted accordingly.

For more information on admissible and inadmissible types of evidence, please see Section IV(E)(10) of the 2022-2026 Collective Bargaining Agreement

Please note: This problem set contains two pages and three problems.
