Subject: Supplement to Sept. 29, 2017 Notice of Intent to File Clean Water Act Suit against Enterprise Products Operating, LLC

Dear Ms. Mitchell and Mr. Schoeffler:

Enterprise Products Operating LLC has received your January 9, 2018 supplemental notice of intent letters. We appreciate your time in our teleconference on January 25, 2018 to discuss these matters.

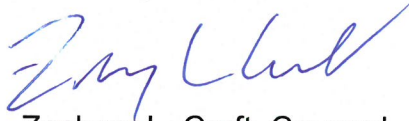

As we understood it, your primary concern expressed in your January 9, 2018 correspondence was two additional areas in which waterways were blocked by earthen debris and branches. We also understood from the discussion that the picture you shared with us was taken on or before December 3, 2017.

I am pleased to share the attached pictures, taken on or about December 11, 2017 (and therefore after your picture), which show the two additional areas unblocked and with water flowing through them. In addition, because our construction activities associated with the pipeline in question were completed by December 11, 2017, you may wish to consider whether any post-December 11, 2017 changes to site conditions were caused by other persons or by natural forces. We would encourage you and your clients to reevaluate the current status of all areas of concern and contact us again before any decision to file suit.

Enterprise continues to take environmental compliance and protection issues and your clients' concerns seriously. We believe that the circumstances noted in each of your notice letters to us were temporary and hope that the information we have provided satisfies your concerns.

If you would like to discuss further, please do not hesitate to contact me.

Kind Regards,

Zachary L. Craft, Counsel
