Hi Brad,

This is an email from another fishermen complaining about more violations by Enterprise. Frog season is on the way and these people cannot make a living because of these violations. Please help if you can.

Thank you,

Dean

Airboat drivers cut trees in pipeline canal out of right away. I will get you the name of the pipeline later. The current created 4 small branch dams which we can no longer pass in canal. Used to pass in canal at 3.5' and today July 30, 17 water is at 7' and can't pass in pipeline because of dams. The yellow sign is where they built wooden bridge across same pipeline out of right away for their convenience but we can longer pass because it is now non navigatable.
